Use proposed standards.

Instructions

Each Variety is worth a set number of points. If the rat is perfect within that category, full points are given. If faults are seen the judge is to circle points to be subtracted from each relative category.

If categories do not apply to variety/section those are to be skipped. Percentile will be used rather than points so various variety/sections can be fairly judged against one another for Best of Show. Example:
scored 97 points out of 100 therefore $97 / 100 = 97\%$
scored 107 points out of 110 = $107 / 110 = 97\%$

Points Possible below
